

We talked to Dr. Tomic, who together with his partners from the company PolardAid Health have recently entered the Canadian market. New product, new people, new environment. The big challenge! Dr. Dino Tomić is a specialist in gynecology and obstetrics. For more than 20 years he has been exploring other treatment options beyond the limited domain of conventional medicine. He deals with the quantum and bioresonance medicine, as well as with homeopathy acupuncture, some of the energy techniques such as reconnection, reiki, new technologies of consciousness ...

Novine Toronto: How did you as a “conventional” medical doctor start to use alternative medicine?

Dr. Dino Tomić: “Each of us in the conventional medicine relatively quickly comes to the moment when realizes that he can no longer help the patient in ways that is learned, and by resources made available to conventional medicine. Some are satisfied with something found in their work, but today there is a growing number of doctors who continue to search for other ways to really help a sick man to solve his health problem.

Within the so-called alternative medicine there are plenty of disciplines, and today the latest one is quantum and bioresonance medicine that really go for hundreds of years ahead of our time. For a long time it is clear that we are beings of electromagnetic nature. It has been scientifically proven, and a lot of diagnostic procedures in modern medicine are based on our measurement of electromagnetic parameters, and thus assess the level of our physical health or function of certain body parts. The most famous of these methods are: ECG, EEG, EMG, MRI and other less known.

The absurdity of the whole story is that such diagnostic methods are not followed by appropriate treatment, but everything consists of use of pharmacological preparations, which are increasingly coming into question because of its inefficiency and horrific side effects. Is it justified to declare some diseases incurable, and that the treatment of same consists of lifetime addiction to drugs, if it is known that the same diseases were successfully treated decades ago?”

NT: Was there the great resistance and what were the reactions of the environment you worked in?

Dr. Tomić: “Given the global trend of turning to natural treatments, it is no longer a problem to explain the possibilities of other forms of treatment outside the realm of conventional medicine. Of course, there is a growing number of doctors who are educated and they introduce into their practice the latest

diagnostic and therapeutic methods of treatment (quantum medicine, bio-resonance medicine). Resistance in the medical community is becoming lower, which is indicated by the fact that many doctors, including members of their families, use the alternative ways of treatment for their medical problems. This is a huge wave that can no longer be stopped. A kind of collective awareness occurs”.

NT: When and how did you start thinking about the disc? What was the trigger to start the process and learn that such a type of product can work?

Dr.Tomić: “I have been dealing with this technology and studying of Nikola Tesla’s work for more than 20 years. I was fascinated by the fact that long time ago Tesla and Lakhovski successfully treated diseases which are now declared incurable. This is why I got so deep into the studying of this matter”.

NT: Lakhovsky and Tesla, as you say, have achieved great results by using their high-frequency oscillators and vortex antenna. Would you describe the process of creating your disc?

Dr.Tomić: “Being fascinated by whole this story, I have been dealing with these issues with several fellow doctors and engineers for several years. We have managed to procure and make the most of the apparatuses and devices that were used in that period of time. We found the original schemes of the devices from the Nikola Tesla Museum in Belgrade and from all over the world, wherever they were available. The results we obtained with these devices were fascinating.

We have managed to solve the problems our patients struggled with for years. Only a few treatments were enough to solve their problems with locomotor apparatus (the spine, joints, tendons, ligaments). Conventional medicine could not help them with these problems. We have managed to heal some of the so-called “incurable” diseases, such as hypothyroidism (Hashimoto's disease), in the same way as Georges Lakhovsky and Nikola Tesla did many years ago.

However, taking into account all the techniques we used, I was most impressed by the polarization antenna or a polarization disc – Polar-Aid. It is a small device with no supply of electrical power, but it achieves fantastic effects and results in a person who uses it”.

NT: It is known that the disease at physiological level occurs some time after energy level drop and disorder (disruption) of energy flow in our body. How does disk regulate this?

Dr.Tomić: “The fact that energy is crucial for the state of our physical health has been known for thousands of years. Six thousand years ago Chinese people tried to make an energy balance in human body with the help of acupuncture. This eventually led to a large number of energy methods that had worked in a similar manner. So it was important to raise the energy level and to ensure its smooth flow through the body. Once this is achieved, the disease is just starting to disappear on its own.

There are various techniques for self-healing, but many people cannot easily master them and apply to themselves and others. Since I use some of them (reconnection, reiki, new technologies of consciousness), I know what it is possible to achieve with them. However, when I started to experiment on myself with this disc, I just could not believe that a single disc was several times more effective than

all the techniques I knew. So, there is no more need for education and training in various techniques.

With Polar-Aid in your hands, you become a supreme healer without a single day of training. It simply fosters in multiple ways the energy inflow (bioenergy) in your body inciting it to cure itself in a completely natural way, which is anyhow the only possible solution. Essentially, you have in your body all self-healing mechanisms and natural remedies that function perfectly, with no danger of overdosing. The problem will occur when the energy level has been lowered or when the energy inflow has been disrupted, which will be successfully compensated for and solved by Polar-Aid. For a short time it will give you back the joy of living.”

NT: What are the first symptoms that we feel when we start to use the disc? What happens to our body and after what period of time we can expect some changes?

Dr.Tomić: “When using Polar-Aid, you may experience certain sensations in the particular part of your body, which may be in the form of stronger pain, stitching, aching, pressure, burning and warming sensation, enhanced bowel function, etc. Those with compromised health will have more conspicuous discomforts. Don’t let this frighten you because it indicates that there is a dysfunction on that point, and that the body is currently activating its forces to fix it. These sensations will gradually diminish, until they disappear, that is, until the discomfort has been eliminated totally on that point, and the body has been purged from the collected toxins

The disc does not have any self-radiation, magnetism and alike. It is a natural energy, and for its use, there are no contraindications.”

NT: Results achieved so far have shown that disc helps with many health problems. Its ease of use and effectiveness in the treatment are fascinating.

Dr.Tomić: "The method of application is extremely simple. If you have a pain of any kind, as one of the most common symptoms, you can simply place the disc on the painful spot and the pain will quickly disappear or be reduced to the threshold of tolerance.

There are thousands of testimonies of people who do not use analgesics anymore, but they were used to use them for years before to relieve their pain. This is natural therapy, without any toxic effect. So, it does not work after a few days but instantaneously. Together with disc, you will get instructions for use suggesting a wide range of application methods. It simply reflects positively to all aspects of your health”

NT: There are people who have the ability of self-healing. Some of them feel that they do not need any instruments or products to improve their health?

Dr.Tomić: “This is pure science. Now there are many things the nature of which we do not know enough although we widely use them. One of these is electricity. Few people think from a scientific point of view about what happens when you press the switch and turn on the lights. But there is no man who would give up its convenience and comfort. The same is with the disc. At the moment when you feel its power, it will not be important for you how it works, you will be simply enchanted by the results you have achieved.”

NT: Recently you have had a representative office on this continent, so that the disc can be ordered throughout the United States and Canada. What are your plans and can we expect you to visit us?

Dr.Tomić: "Of course, I look forward to coming soon to Canada and meeting with many friends and associates. With Polar Aid disc circle of my friends is expanding rapidly, so I hope that by the beginning of April, when a great fair of alternative medicine will be held in Toronto, I will already have a huge number of friends in Canada.

NT: What fulfills you and makes you happy?

Dr.Tomić: "As I mentioned, I am most proud of the huge number of friends I have throughout the world thanks to the miraculous disc.

I'll take this opportunity to thank Georges Lakhovsky, a brilliant Russian scientist, who, thanks to his great invention, allows us to contact with the endless ocean of life energy and the universe and therefore the Creator".
